

DATA CENTER MODERNIZATION

With the proliferation of Virtualized Workloads, Big Data, Artificial Intelligence, Data Analytics, and more, the amount of data organizations generate can cripple legacy data centers. Modernizing your data center is becoming more than just something to eventually get around to—it's a necessity. Doing so delivers agility, efficiencies, innovation and key analytics. The end result? Higher profitability and a greater competitive edge.

GDT's solutions architects and engineers modernize customers' data centers by combining once siloed elements into cohesive, software-defined virtual environments. So, whether you're running legacy or cloud-native applications, either in a private, public or a hybrid cloud model, data center modernization can accommodate those needs and workloads.

ON-PREM, CLOUD, OR HYBRID DELIVERY MODELS

Through a software-defined infrastructure, Compute, Storage, Networking and Management can all be delivered at the speed of business.

MANAGEMENT

All elements can be governed by customized policies, so management of the entire infrastructure can be accomplished more easily.

DEPLOYMENT

Resources deploy automatically, which frees up time for IT personnel to better focus on key initiatives.

PROVISIONING

Provisioning new applications can be accomplished in minutes, and Compute, Storage, and Networking can be combined into a single rack.

Through automation, production-ready applications and infrastructures can be quickly provisioned, eliminate manual errors, and greatly enhance the utilization of personnel and resources.

➤ GDT DATA CENTER MODERNIZATION PARTNERS:

THE GDT DATA CENTER MODERNIZATION DIFFERENCE

GDT's Data Center Modernization practice is comprised of highly talented and tenured solutions architects and engineers who deliver the many benefits that Data Center Modernization provides, including software-defined:

NETWORKING

COMPUTE

MANAGEMENT

STORAGE

TRANSFORMATION

MULTIPLE BENEFITS - PROVEN RESULTS

- Bring products and services to market faster
- Roll out new applications in a fraction of the time
- Better monitor and manage IT infrastructures

GDT customers enjoy the many benefits of data center modernization, and do so while maintaining security and gaining better control of their IT infrastructure.

WHY GDT?

Founded in 1996, GDT is an award-winning, technology integration partner. GDT specializes in designing, building, and delivering best-of-breed technology solutions for service providers, enterprise networks, data centers, and more.

800M+ ANNUAL SALES

750+ ASSOCIATES

250+ CERTIFIED ARCHITECTS & ENGINEERS

150+ MANAGED SERVICES ENGINEERS

TOP STRATEGIC PARTNERSHIPS

23+ YEARS IN BUSINESS

56 COUNTRIES SUPPORTED

4 ISO-CERTIFIED LOGISTICS & INTEGRATION CENTERS

4 AI-ENABLED NETWORK OPERATION CENTERS

design IT. ➤ build IT. ➤ deliver IT. ➤ manage IT.
