

ENTERPRISE NETWORK

Ensuring your organization's mission-critical information gets from point A to point B on time, every time, is no longer simply about measuring SLAs and requesting related credits. Network connectivity is now about helping organizations remain competitive in the marketplace, bring products to market faster, and deploy business-driving initiatives that shape companies for years to come.

Today's IT professionals are tasked with more responsibilities than ever, which is why some of the most noteworthy enterprises, service providers, healthcare organizations and government agencies in the world have turned to the Enterprise Networking Solutions professionals at GDT.

ENTERPRISE NETWORKING COVERS ALL THE BASES

Enterprise Networking is far more than moving data through LANs and WANs. It involves managing, maintaining and monitoring every facet of customers' networks, including:

DATABASES

CLOUD DESIGN

APPLICATIONS

AUTOMATION

NETWORK MANAGEMENT

MOBILE NETWORKING

COLLABORATION SOLUTIONS

COMMUNICATION PROTOCOLS

INTELLIGENT EDGE

DATA CENTER MODERNIZATION

NETWORK VIRTUALIZATION

OPERATING SYSTEMS

SECURITY

STORAGE SOLUTIONS

INTERNET ACCESS

EMAIL

ENTERPRISE NETWORKS THAT DRIVE BUSINESS

GDT's talented, tenured solutions architects and engineers turn customers' network backbones into agile machines that digitally transform their organizations. They design and deploy enterprise networks that address the issues that have hindered IT organizations for years by helping customers:

- Identify the data requirements that are unique to departments, locations and users
- Eliminate inefficient resource siloes, such as those for compute, network and storage
- Analyze existing resources and integrate them, as needed
- Define policies and standards from which to make future networking decisions
- Identify all security requirements and ensure all assets, data and information are protected
- Help IT organizations justify changes to upper management
- Consolidate and centralize resources
- Analyze and reduce, when needed, physical servers through virtualization or functional redundancies
- Implement file storage solutions that consolidate centralize storage and consolidate files
- Design a common directory service to more effectively manage authentication.

WHY GDT?

Founded in 1996, GDT is an award-winning, technology integration partner. GDT specializes in designing, building, and delivering best-of-breed technology solutions for service providers, enterprise networks, data centers, and more.
