

NEXT-GEN SECURITY SOLUTIONS

The defense of your data infrastructure is only as effective as the strategy you have in place, and one thing's for sure—infrastructure is the target. GDT's advisor-led approach helps solve for the known and unknown security issues your organization is currently facing, or will soon have to address.

EXPERTS IN TODAY'S EVOLVING CYBER KILL CHAIN

Over the last 25 years, GDT has seen that what works to defend against cyber threats today may not work tomorrow. This awareness is what enables GDT's platform-centered security approach to stand above our competitors' product-led strategies. Our cyber security partner ecosystem is comprised of leaders in platform-centric security, including Cisco, Fortinet, Checkpoint Software and Palo Alto Networks. When these and other trusted partners' solutions are combined with GDT's industry expertise, enhanced awareness, reduced risk and operational excellence are the outcomes.

PARTNERING WITH INDUSTRY LEADERS TO ADDRESS A MOVING TARGET

GDT works closely with leaders in IT security, and when their security products and services are combined with GDT's security experts, customers not only understand their attack surface, but know it's fully protected.

 <p>THE APPLICATION</p> <p>The proliferation of SaaS & cloud solutions dictates how we work and play. However, it has created new opportunities for attackers to exploit the vulnerabilities of their platforms.</p>	 <p>THE NETWORK</p> <p>Internal and external network elements are constant targets of reconnaissance and breaches. VPNs and outward-facing, open ports reveal vital information about your posture.</p>	 <p>THE USER</p> <p>Employees produce the greatest security threats. "Cyber Vigilance" is complex to manage and require an "always on" approach to data visibility and control.</p>
---	---	---

With an increasing number of remote workers, IoT devices and cloud applications, sprawl is inevitable, and in 2019 the attack surface is broader than ever. While modern endpoints are natively in the cloud and intelligently find their way to the Internet, unmanaged smart-devices, cameras, printers and other endpoints are broadening the attack surface.

A MATRIXED APPROACH TO DATA DEFENSE

With the power of our exclusive user behavior analytics, machine learning and cognitive AI, we go beyond MDR to detect and remediate:

- Network, endpoint and application reconnaissance
- File and data anomalies across your organization
- Malicious software or unpatched applications
- Vulnerable endpoints and network elements

By applying data science, GDT's SecOps and DevSecOps professionals constantly create and deploy innovative security tactics, such as:

- Designing and implementing needed algorithms
- Uncovering sensitive process isolation
- Sandboxing to evaluate unverified code
- Integration with threat intelligence & existing tools

GDT's solution engineers and security analysts manage, monitor and protect IT infrastructures of all sizes, including those for some of the most notable enterprises, service providers, healthcare organizations and government agencies in the world.

WHY GDT?

Founded in 1996, GDT is an award-winning, technology integration partner. GDT specializes in designing, building, and delivering best-of-breed technology solutions for service providers, enterprise networks, data centers, and more.

1B+ ANNUAL SALES

850+ ASSOCIATES

250+ CERTIFIED ARCHITECTS & ENGINEERS

150+ MANAGED SERVICES ENGINEERS

TOP STRATEGIC PARTNERSHIPS

24+ YEARS IN BUSINESS

185 COUNTRIES SUPPORTED

4 ISO-CERTIFIED LOGISTICS & INTEGRATION CENTERS

4 AI-ENABLED NETWORK OPERATION CENTERS

design **IT.** ➤ build **IT.** ➤ deliver **IT.** ➤ manage **IT.**
