

WIRELESS & MOBILITY SOLUTIONS

GDT's Wireless and Mobility Solutions professionals know how to keep customers competitive in the marketplace by outlining a road map to help them garner usable insights from the masses of data they collect, from IoT devices. In today's business climate, having a poor—or non-existent—wireless and mobility strategy can be the difference between future growth or imminent failure.

GDT PROFESSIONALS REMOVE THE GUESS WORK

By turning to GDT for the development of your wireless and mobility strategy, customers are enjoying peace of mind that comes from working with experts in their field. GDT's Wireless and Mobility professionals satisfy the key elements that separate a solid, effective strategy from one that falls well short of expectations. The GDT Wireless and Mobility experts can provide customers with:

- Turnkey WLAN Services, from RF Designs and Consultations, to full Installation and Turn-up services
- Point-to-point and Mesh Deployments, including Millimeter Wave and Licensed Microwave spectrums
- Secure wireless networks that support voice/video, IoT and real-time location services
- Ongoing management, monitoring and optimization services

The GDT Mobility practice maintains professional and expert certifications with each of our partners, including vendor-neutral programs that meet industry standards. They are experienced in providing solutions to a wide range of industries, including nationwide Retail, Enterprise, High Density, Healthcare, Hospitality, Education, and Distribution/Manufacturing.

WE UNDERSTAND AND MANAGE THE FULL IOT TECH STACK

GDT understands that if any of the key elements of the IoT tech stack isn't fully considered and addressed, a wireless and mobility strategy will only be as good as its weakest link. They consider and analyze:

DEVICE HARDWARE

IOT GATEWAYS

DEVICE SOFTWARE

CLOUD PLATFORM

LARGER ATTACK SURFACE DEMANDS SMARTER SECURITY

With the move toward mobility solutions, organizations' attack surfaces have experienced tremendous growth. Smart devices are only as "smart" as the security protecting them and the networks they access. But IT security often takes a back seat to the fun of forward-minded innovation, especially when so few organizations have the right security skill sets and experience on staff.

That's where GDT's Wireless and Mobility professionals understand that innovation without security is a house of cards. By combining both, they build strong security foundations on which innovative, business-driving wireless and mobility solutions can thrive.

YOUR TRUSTED WIRELESS AND MOBILITY PARTNER

Bottom line results. That's what every IT solution ultimately attempts to deliver, which is why some of the most notable enterprises, service providers and government agencies in the world have turned to the GDT Wireless and Mobility experts.

WHY GDT?

Founded in 1996, GDT is an award-winning, technology integration partner. GDT specializes in designing, building, and delivering best-of-breed technology solutions for service providers, enterprise networks, data centers, and more.
