ADVISORY
SERVICES
TRANSFORMATION

Information technology is transforming faster than it has at any other time in history. Organizations no longer consider IT as a cost of doing business; they're now looking to them for ways to stay more competitive. But the question often becomes: "Where and how do I start?"

The Transformation professionals within GDT's Advisory Services practice have the answers. They understand today's IT demands from years of empirical experience working with some of the most notable service providers, government agencies and enterprises in the world. Let them pass that expertise and experience on to you.

GDT's Transformation Team conducts workshops tailored to meet the specific needs of customers. They provide training in a hands-on, lab environment that encompasses multi-cloud environments, practical DevOps, and how to automate your infrastructure to enhance data collection, processing, monitoring and analytics.

MULTI-CLOUD

Hybrid IT/Cloud

Application Modernization

Cloud Orchestration

PRACTICAL DEVOPS

Infrastructure as Code
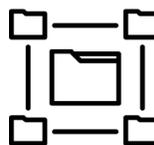

Automated Tools & Platform Rationalization

Software Defined Cloud

AUTOMATED INFRASTRUCTURE

DevOps, NetOps, & SecOps Workshops

Workload Portability

Microservices & Container Assessments

GDT TRANSFORMATION WORKSHOPS

MULTI-CLOUD

☐ **AGILE Mentoring & Guidance**
Adopt organizational and cultural change to develop an agile development methodology.

☐ **Tools & Platform Rationalizations**
100 Developers & 1000 tools—It's the bane of OPs teams, but DEV needs them all. You'll learn how to answer these issues by developing a self-funding Automation Roadmap.

☐ **Measurements & KPI**
Learn how to set up the correct KPI's so you can measure your true agility and show your organization the ultimate measure of value!

PRACTICAL DEVOPS

☐ **DevOps Strategy**
GDT can help you develop your DevOps strategy, from start to operational.

☐ **DevOps, NetOps & SecOps Kickstarter**
Starting the journey? Let GDT get you pointed in the right direction.

☐ **Container Strategy Workshops**
Learn and build containers, orchestration, and work on how it all works in YOUR environment.

☐ **DevOps Frameworks**
Learn how to push through Continuous Integration / Continuous Delivery Pipelines, Automated Testing, Quality Control Gates, Canary & Blue/Green Deployments.

☐ **NetOps Workshop**
Learn it all— everything from the basics to advanced NetOps Automations (tools) on devices & API's, how to process and manage it, & CI/CD DevOps framework adoption.

☐ **Benchmarked DevOps Assessment**
Learn how to benchmark your DevOps practice against others in your industry.

AUTOMATED INFRASTRUCTURE

☐ **Segmentation & Micro-Segmentation Workshop**
Learn how to segment your network to stay compliant & secure, and design a model that rationalizes your technology stack, toolset, skills, and identifies gaps.

☐ **Automation and Infrastructure as Code "Learning and Doing" Workshop**
Which tools and processes are the best for your organization? Get your hands on the latest stuff, while you rationalize your own tool sets.

☐ **Test and Quality Assurance (QA) Process Improvement Workshop**
Learn how to examine requirements needed to design, develop, and manufacture reliable products. Everybody can conduct better quality assurance. Our experts can help.

☐ **Software Practices**
You'll learn how to assess your current software practices, including how they align with DevOps.
