# SD-WAN AS A SERVICE

The most flexible, global SD-WAN as a Service available in the market today.

## About GDT SD-WAN Services

GDT Managed Network Services simplify the management of your end-to-end networking estate, enhancing business functions through improved agility, responsiveness, and scalability. Our SD-WAN capabilities support all major vendor technologies, delivering via consistent processes that provide end-to-end visibility and ultimately ensure a seamless experience for our customers.

## OUR SERVICES

Supporting all market leading SD-WAN technologies

### SD-WAN as a Service Highlights

- **Zero CAPEX** and no upfront or one-time costs to realize the service
- **Global compliance** for regulatory, licensing, tax, and logistic requirements
- **Purpose-built** global private network platform
- **Scalable**, platform-based service model.
- Allows for **flexible use of existing client access types** (e.g. Private Line and Internet)
- Vendor-agnostic, **flexible technology choices** from leading OEMs in SD-WAN and SASE to provide options that align with desired outcomes
- Capability of integrating **Cisco Viptela and Cisco Meraki** into a single, homogenized private SD-WAN network
- Flexible, as a service model allows for **customizable options** in BYO access, equipment, maintenance and licenses.
- **Multiple physical and virtual form factors** to support private, public cloud, data center, and branch locations

## Why Choose GDT

**Committed to quality**

**Global Scale local touch**

**Differentiated offering**

**We partner with you**
