

## GDT CYBERSECURITY SOLUTIONS

Protecting your business in today's hyper-connected, digital world has never been more complex. The threat landscape is evolving faster than ever while technology sprawl extends organizations' attack surface. Meanwhile, C-suite and board members are increasingly cybersecurity savvy, raising expectations of the CISO while increasing the scrutiny of cybersecurity programs and putting additional demands on already strained resources.

### **SECURITY IS PART OF OUR DNA**

Protect your business with GDT Cybersecurity Solutions. As a full-service IT provider, GDT takes a 360-degree, risk-based approach to cybersecurity, offering comprehensive lifecycle security and compliance services. GDT leverages a modern cybersecurity mesh designed for the distributed enterprise, allowing security to be extended confidently where it is most needed. GDT cybersecurity experts focus on increasing your agility to respond optimally to the changing threat landscape and technology ecosystem.

GDT has a proven track record of helping clients fortify their digital defenses against security threats and vulnerabilities. Our highly skilled and experienced experts are committed to delivering the highest level of service and protection, whether you're expanding your infrastructure, adopting new technologies, or accommodating a distributed workforce. Our goal is to ensure that security remains an enabler rather than an obstacle to progress, allowing you to pursue new business opportunities and technologies while effectively managing cybersecurity risks.

### **GDT DELIVERS BUSINESS OUTCOMES**

We base our results on measurable outcomes utilizing our proven service delivery models. Our solutions achieve critical business outcomes, including optimizing security operations, controlling costs, and gaining operational confidence. In addition, we can help you improve your security posture, strengthen cyber resilience, manage risk, and demonstrate security due diligence and compliance.

# GDT Cybersecurity Solutions

GDT enables capabilities that help you achieve cybersecurity goals in support of your business strategy, ensuring your organization is protected and your reputation is intact. We believe that cybersecurity starts with a goal of reducing technology risks, so we build security into every aspect of your technical environment, from the cloud and data center to end-point devices and all points in between.
