GDT ASSET MANAGEMENT PLATFORM

Make the Most of Your IT Portfolio

The typical enterprise company spends millions of dollars annually on new technology, with most purchases containing software or maintenance subscriptions. Yet most lack unified insights across their IT infrastructure. Instead, companies manually track their assets in spreadsheets or not at all, leading to outdated information, compliance risks, and higher costs.

Optimize your investments and ensure compliance across your IT portfolio with the GDT Asset Management Platform (GDTamp). Available exclusively to GDT clients as a value-add, this robust asset management platform provides a single dashboard to view and manage all your software and maintenance subscriptions and enterprise agreements (EAs).

WHAT YOU CAN DO WITH GDTAMP

- Manage expiring assets
- Make informed decisions
- Plan for end-of-support
- Right-size software license utilization
- Streamline EA management & true-forward analysis

GDTAMP BENEFITS

- **Increased visibility:** Gain single-pane visibility across your technology estate, including location, serial numbers, contracts, expiration/ renewal details, utilization, end-of-support, associated costs, and more.

- **Improved license and contract management:** Avoid costly true-forward or true-up events, prevent EA misuse, and proactively manage consumption.

- **Budget optimization:** Right-size maintenance spend by identifying over- and under-utilized licenses and assets and other opportunities to lower costs.

- **Greater compliance:** Eliminate the risk of software license non-compliance by proactively managing software consumption and enforcing correct license usage.

- **Reduced downtime:** Lower downtime risk by ensuring critical network devices have proper service coverage.

GDT Software & Support Services

The GDT Software & Support Services team helps you do more with your IT investments. GDT helps businesses transform software and maintenance contracts into strategic enablers that accelerate business outcomes through our comprehensive buying models, resources, platforms, and lifecycle services. GDT partners with you to custom-build agreements that directly support your business objectives and fuel value by enabling your business to expedite time-to-value, control costs, mitigate risk, and streamline operations.
